

Strawberry F1 Hybrids

Short cultural description for amateur grower

Sow the seeds early January - end of March at room temperature (22 °C).

Keep the seed moist by a thin layer of soil or by other measures.

Prick out seedlings when first true leaf has emerged (after 4-6 weeks).

Harden plants off before planting in your garden (Mid April - begin of June).

Water well before planting

Plant in full sun in well drained soil.

Water frequently, manure every week and remove runners from time to time.

Harvest the delicious fruits from end of June until the first night frost.

Advices for cultural practice

Information provided by ABZ Seeds, in any form whatsoever, is without commitment. Descriptions, recommendations and illustrations in brochures, info-sheets and on the website, are based as closely as possible on experiences in tests and in practice. The Seller in no event accepts any liability, however, on the basis of such information for different results in the cultivated product. The buyer itself must determine whether the goods and information are suitable for the intended growth and/or can be used in the local conditions.
